

FRAME BOLTS, HEX WASHER

Grade 8 &
Stainless Steel

±Length of a frame bolt is measured from the underhead bearing surface to the extreme end of the screw.

Description	A one-piece hex-washer head bolt with a flat bearing surface, made of high-alloy steel. Indented top of the head is optional	A one-piece hex-washer head bolt with a flat bearing surface, made of stainless steel. Indented top of the head is optional.
Applications/ Advantages	For use on truck frames. The flange eliminates washers and helps compensate for a misaligned hole. Used with a Grade-GT lock nut, the bolt system resists bolt slippage by distributing the clamp load over a wide area.	Used in applications where greater resistance to corrosion is required and increased bearing area is desired.
Material	AISI 4037 - 5135 or equivalent alloy steel	18-8 Stainless Steel
Heat Treatment	Grade-8 frame bolts shall be heat-treated, oil-quenched and tempered at a minimum temperature of 800°F.	-
Core Hardness	Rockwell C33 - C39	Overall Hardness: 1/4 thru 5/8" diameters: Rockwell B95 - C32 3/4 thru 1 1/2" diameters: Rockwell B80 - C32
Surface Hardness	Rockwell 30N58.6 maximum	
Proof Load	120,000 psi.	-
Yield Strength	130,000 psi. minimum	1/4 thru 5/8" diameters: 65,000 psi. 3/4 thru 1 1/2" diameters: 45,000 psi.
Tensile Strength	150,000 psi. minimum	1/4 thru 5/8" diameters: 100,000 - 150,000 psi. 3/4 thru 1 1/2" diameters: 85,000 - 140,000 psi.
Coating	See Appendix-A for information on the plating of frame bolts.	Stainless flange bolts are usually supplied with no additional finish.

**Product standards require the manufacturer's head marking to appear on the top of all bolts 1/4" diameter and larger.

"X" represents one location such a marking may appear.
